Domain Setup Guide — Squarespace

Flames of Passion Entertainment

Prepared by: Marceau Solutions **Date:** March 2026

What This Guide Does

This guide walks you through two things:

1. **Cancelling your Squarespace website subscription** (you don't need it — your website is already built and hosted for free)
2. **Pointing your domain to your live website** so people can find you at your custom URL

PART 1: Cancel Your Squarespace Website Subscription

Your website is already live and hosted through GitHub Pages (free). You do NOT need a Squarespace website plan. You only need to keep your domain registration, which is billed separately and is much cheaper (~$20/year vs $16-49/month for the website builder).

Step 1: Log Into Squarespace

1. Go to **squarespace.com**
2. Click **Log In** (top right corner)
3. Sign in with your account

Step 2: Go to Your Website Settings

1. From the Squarespace dashboard, click on your **website** (not your domain)
2. In the left sidebar, click **Settings**
3. Scroll down and click **Account & Billing**
4. Click **Billing**

Step 3: Cancel the Website Plan

1. You should see your active website subscription
2. Click **Cancel Subscription** or **Cancel Plan**
3. Squarespace will ask why you're cancelling — you can select "I'm using a different platform" or "Other"
4. Confirm the cancellation

Important: This only cancels the website builder subscription. Your **domain name stays active** — it's a separate billing item. You'll continue to be billed ~$20/year for the domain only, which you need to keep.

Step 4: Verify Your Domain Is Still Active

1. After cancelling the website plan, go back to the main dashboard
2. Click your **profile icon** (top right) and select **Domains**
3. You should still see your domain listed and active
4. If it says "Active" or "Auto-Renew On" — you're good!

PART 2: Point Your Domain to Your Website

Now we need to tell your domain where your website actually lives.

Step 5: Go to DNS Settings

1. From the Squarespace **Domains** page (where you verified your domain in Step 4)
2. Click on your domain name
3. Click **DNS** in the left sidebar
4. Click **DNS Settings**

Step 6: Remove Any Existing A Records

Before adding new records, check if there are any existing **A records** listed.

- If you see any A records, click the **trash can icon** or **X** next to each one to delete them
- **Keep** any MX records (for email) and TXT records — don't touch those

Step 7: Add the 4 A Records

Click **Add Record** and select type **A**. You'll do this 4 times.

For each one, enter:

Record #	Host	Data (copy exactly)
1	`@`	`185.199.108.153`

2	`@`	`185.199.109.153`
3	`@`	`185.199.110.153`
4	`@`	`185.199.111.153`

Click **Add** after each one.

Step 8: Add the CNAME Record

1. Click **Add Record**
2. Select type **CNAME**
3. Enter:

Host	Data (copy exactly)
`www`	`marceausolutions.github.io`

1. Click **Add**

Step 9: Verify Your Records

Your DNS settings should now look like this:

Type	Host	Data
A	@	185.199.108.153
A	@	185.199.109.153
A	@	185.199.110.153
A	@	185.199.111.153
CNAME	www	marceausolutions.github.io

If yours matches — you're all set!

PART 3: Wait & Test

Step 10: Wait for DNS to Propagate

DNS changes take a little time to spread across the internet:

- **Usually:** 15–30 minutes
- **Worst case:** Up to 48 hours (rare)

Step 11: Test Your Domain

After waiting 15–30 minutes:

1. Open a browser (try incognito/private mode)
2. Type in your domain
3. You should see your Flames of Passion website!
4. Also try with `www.` in front — that should work too

If it's not working after 30 minutes:

- Double-check the IP addresses — no typos
- Make sure there are no old A records left
- Clear your browser cache or try a different browser
- It can sometimes take up to 48 hours

Step 12: Text Me When It's Working!

Once you see your website loading on your domain, send me a text so I can:

- Turn on HTTPS (the padlock icon in the browser)
- Verify the booking form works on your domain
- Make sure everything looks perfect

Need Help?

If you get stuck at any point, just text or call me:

William Marceau Phone: (239) 398-5676 Email: wmarceau@marceausolutions.com

Happy to hop on a quick call and walk you through it!

Quick Reference — All Values

What	Value
A Record IP #1	`185.199.108.153`
A Record IP #2	`185.199.109.153`
A Record IP #3	`185.199.110.153`
A Record IP #4	`185.199.111.153`
CNAME Host	`www`
CNAME Points To	`marceausolutions.github.io`
